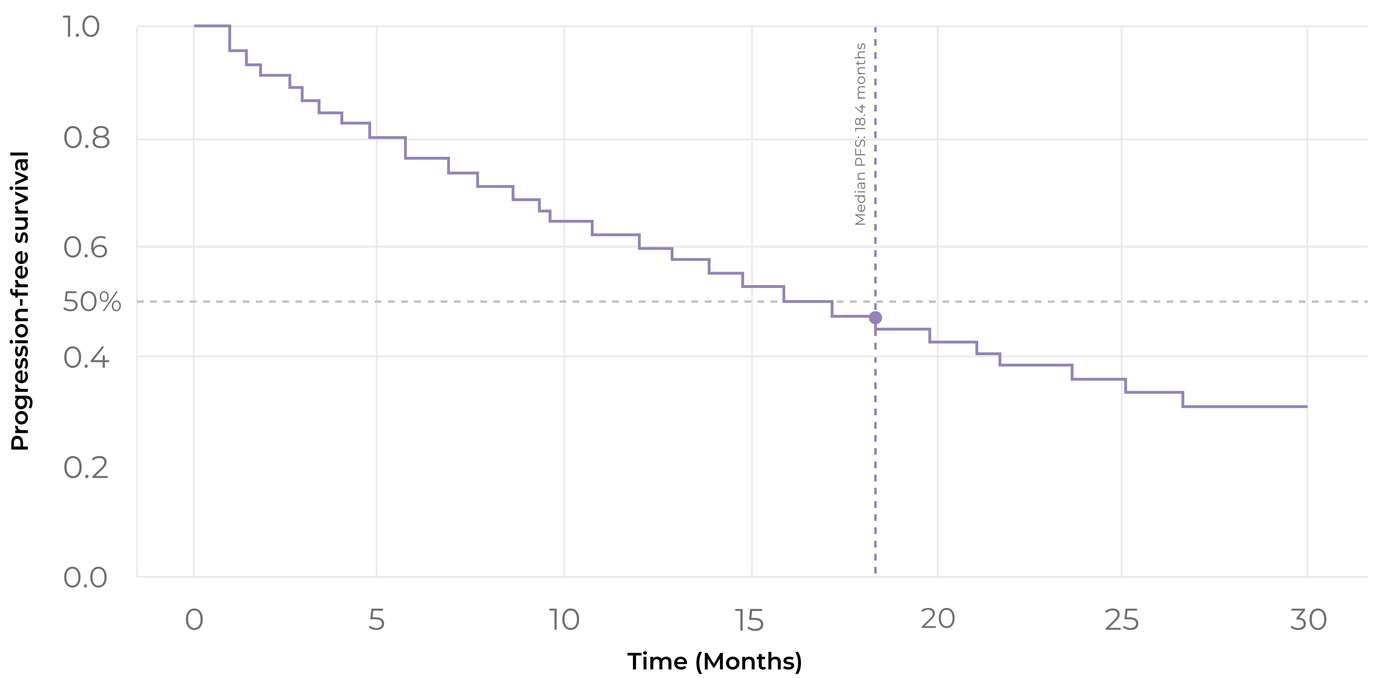
Significant improvement in progression-free survival

ASCEND-1 Phase III Study

COMPETITORS

Randomised, double-blind, phase III study evaluating Oncura versus standard EGFR therapy in patients with EGFR-mutated metastatic NSCLC.



Choose a region

- Median PFS: 18.4 months Oncura
- Median PFS: 11.2 months Egrifex
- Median PFS: 10.1 months Capsorin
- Median PFS: 8.0 months Injectra

STUDY DESIGN +

*Data from ASCEND-1 phase III study
HR: hazard ratio; **PFS:** progression-free survival
