# Adverse events: most common events

The majority of adverse events were low grade and manageable with supportive care and dose modifications.

| Adverse | Any grade (%) | Grade ≥3 (%) |
|---|---|---|
| Rash | 45 | 5 |
| Diarrhoea | 35 | 3 |
| Dry skin | 28 | 1 |
| Paronuchia | 18 | 1 |
| Stomatitis | 14 | 1 |
| Fatigue | 22 | 2 |
| Elevated ALT/AST | 12 | 2 |
| Decrease | 10 | < 1 |

- **Low discontinuation due to AEs**
- **Dose interruption/ reduction supported continuation** in most patients
- **Early recognition + supportive care** are important

**ALT/AST:** liver enzymes.
