Supporting adherence with a once weekly routine

Clear guidance and simple routines can help patients stay on track with once-weekly Oncura therapy.

Set a weekly treatment day
Encourage patients to choose the same day each week.

Use reminders
Calendar alerts or phone reminders can support adherence.

Link dosing to a routine
For example, take the tablet with a regular weekly activity.

Provide clear instructions
Ensure patients understand what to do if a dose is missed.

Encourage open communication
Patients should report side effects or concerns promptly.

This reinforces: Weekly rhythm, Simplicity, Predictability*
